## Summary

I am a web developer with years of experience, I have passions for all things new and interesting in tech industry. With a `jack-of-all-trades` mindset I have learned and worked as a web, mobile, desktop and app to hardware developer. I specialize in Vue.js (also do vanilla JavaScript), Go and PostgreSQL, but will gladly learn any new technologies needed.

## Projects

- **Company Profile Website** of GMN (Graha Multimedia Nusantara) company and Zumstar (one of GMN's products), built with **Wordpress, MySQL and TailwindCSS**. [site](#), [explore](#)
- **Rental Housing**. Rental flat, private and public housing in Indonesia for low economic citizen, supply and demand management of properties, facilitate citizen to book and rent house with ease. Built with **Go, MySQL, Vue.js 3, Quasar, TailwindCSS** and **Heroku**. [demo site](#), [explore](#)
- **Ship Rent Management** aim to ease fishermen to rent ships, including picking type of ship, setting rental period, extending the period, monitoring their payment and reports. Built with **Laravel, MySQL, Vue.js 2, Vuetify**.
- **Meeting Room Management**. A mobile application for scheduling meeting with booking available rooms feature, note of MOM, participants invitation, extending meeting time if possible, order meals to the pantry, etc. Built with **Laravel, MySQL, Flutter, SQLite**.
- **Billing Receipt Generator**. A tool to produce generated billing receipt with some configurations. Built with **NodeJS, Electron, Vue.js**.
- **Smart Home & Office**. Mobile and Web app for managing, controlling and monitoring devices at home e.g lamp/light, door lock, TV, CCTV, air conditioner, curtain, switch, sensors, etc. It's main features are: Managing, Controlling and monitoring devices, Configuration, User management, Role, Permission, etc. Built with **Java, NodeJS, MySQL, AngularJS**.
